How to upgrade to LWRP / Universal Pipeline

Make sure your project is properly set up to use LWRP or Universal Pipeline.

Locate the '**3D Props Casual Character 1 > Upgrade > URP_10+**' folder, open the bundled integration package and import it into your project.

This will overwrite the standard shaders, custom shaders and materials available in LWRP.

You can also revert to standard materials by opening and importing the integrated package '3D Props Casual Character 1 > Upgrade > Built_In'.

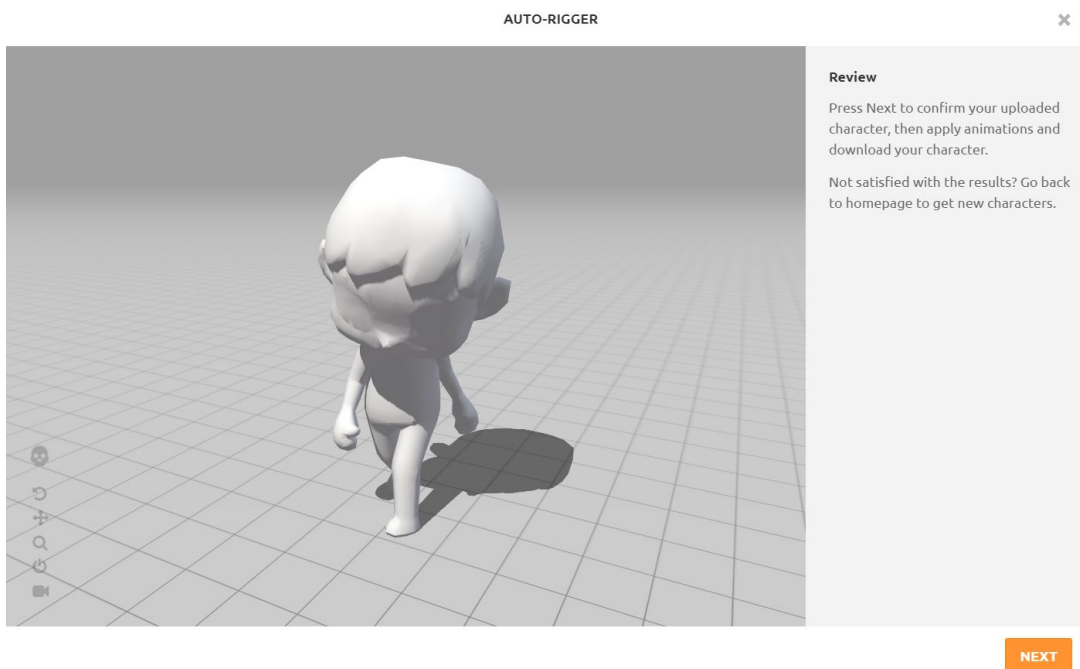

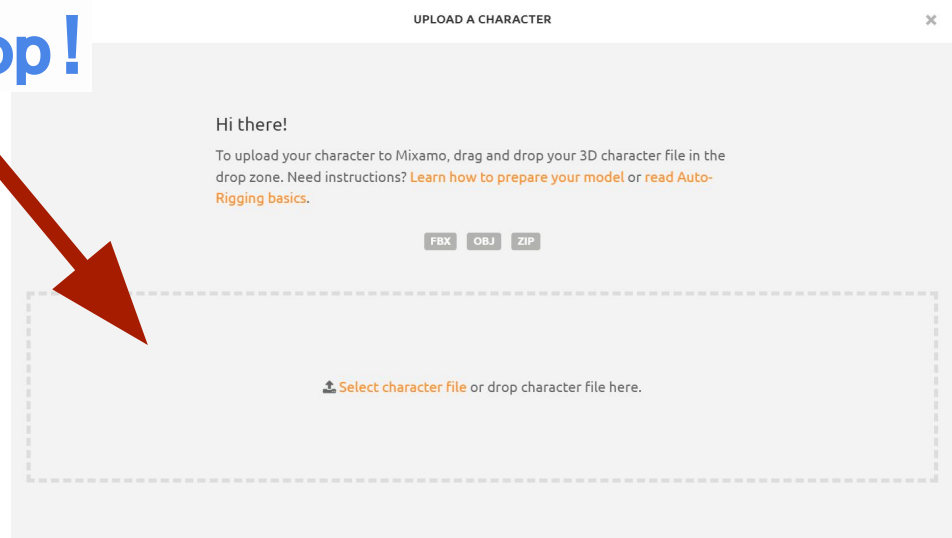

It's a character basic FBX file

If you want to extract animations from mixamo.

You can use this file.

 Character	2023-12-20 오후 9:42	3D Object
 Character.fbx.meta	2023-12-19 오후 5:17	META 파일
 Character_Basic	2023-12-21 오후 5:14	3D Object
 Character_Basic.fbx.meta	2023-12-21 오후 5:15	META 파일

Drag & Drop!

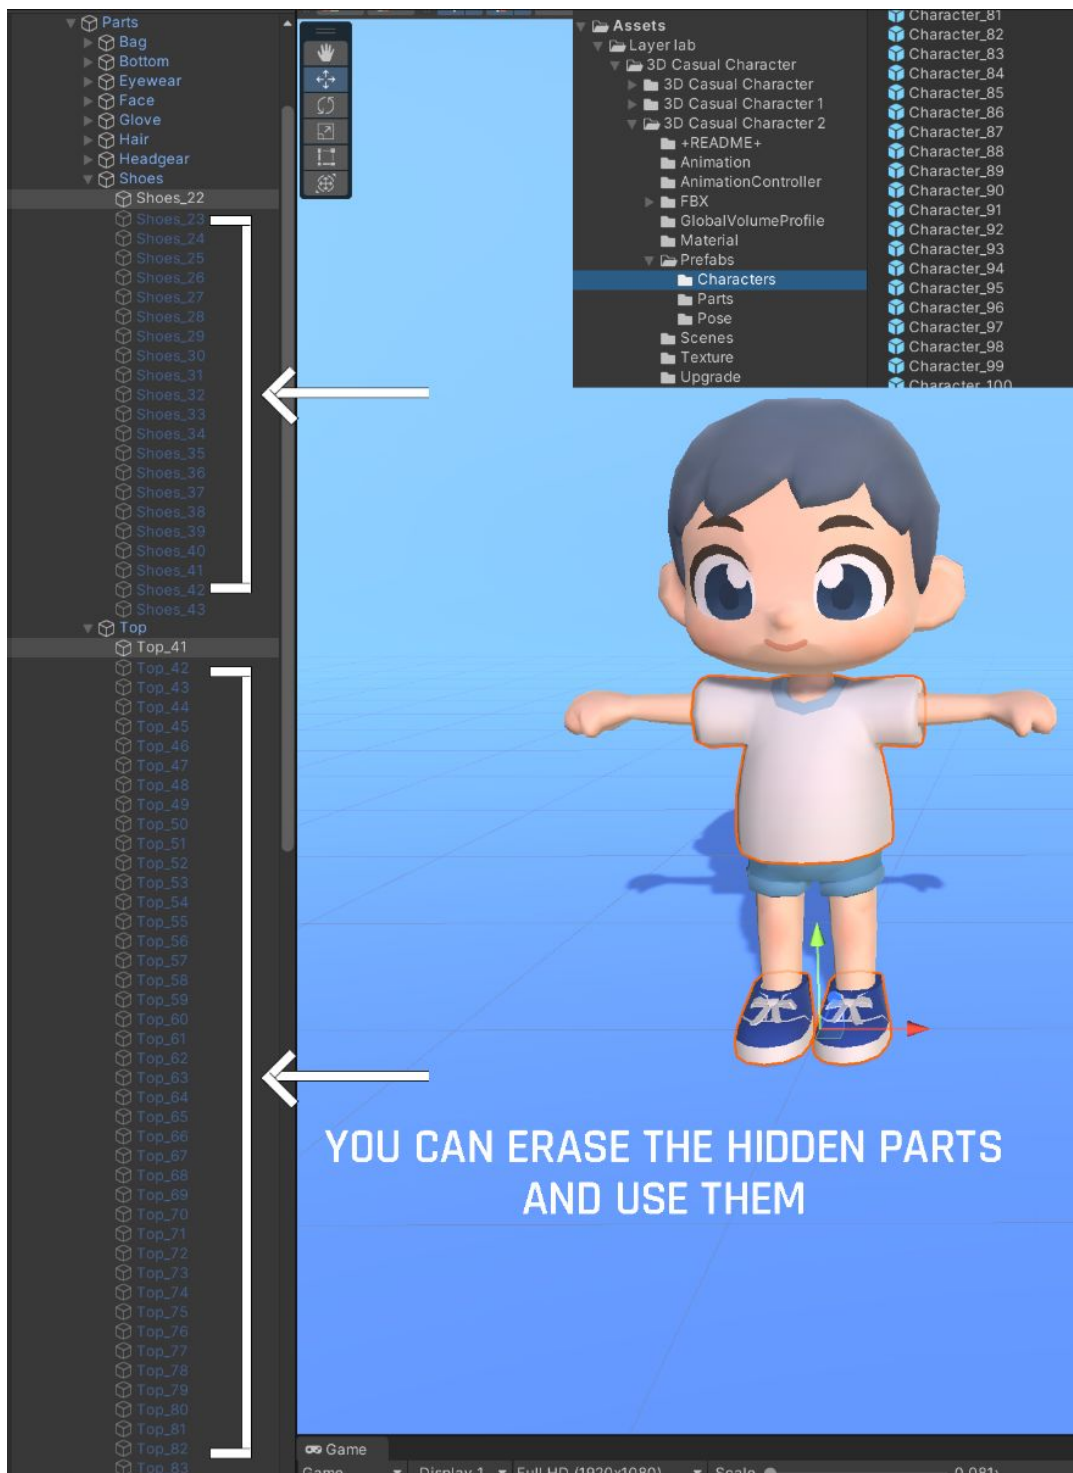

08 Character

FBX doesn't need to be exported separately

Open the entries of the characters in the folder

You can erase the hidden parts and use them

**THANK
YOU**
